

Endpoint Registration

Take your video conferencing off-prem, and into the Videonor Cloud.

The Videonor Endpoint Registration service provides hosting for all standards-based video conferencing endpoints. For businesses who are using video regularly, the Videonor Cloud solution will eliminate your need for an on-prem server - saving your company the huge costs of supporting and maintaining servers.

FEATURES

- > Hosting for all standards-based video conferencing endpoints & configuration
- > Unlimited calls (interally & externally)
- > Global video roaming over a QoS network with PoPs all over the world
- > Integration with a video conference directory supporting over 40,000 entries
- > Leverages pricey hardware investments previously made
- > Eliminates on-prem maintenance costs
